

SS INSTRUMENTS

MANUFACTURERS OF TEST AND MEASURING EQUIPMENTS

96, 4TH CROSS, 2ND MAIN, INDUSTRIAL LANE, NEAR SAI MANDIRA, KAMAKSHIPALYA, BANGALORE 560079

PROOF LOAD TESTING MACHINE

The Proof load testing machine (PLM) by ss instruments is designed to verify the mechanical strength and reliability of cables by applying controlled load conditions. It ensures that cables can withstand specified loads without permanent deformation or failure, meeting industry quality and safety standards.

KEY FEATURES

- Used as end-of-line testing for crimping or die casting of all types of cables.
- Range: 100 Kg ,200 kg, 500 Kg
- Table size - 1.5m, 2m, 3m.
- Features:
 - Adjustable load testing
 - Marker output for OK / NOT OK cables
 - Highly accurate load cells & controls
 - Microcontroller unit / PLC HMI controlled
 - Servo-based machines for better accuracy & control
- Application: Die casting or crimp load testing as end-of-line machine

Custom-Built Special Purpose Machine ● Accuracy ● Reliability ● Productivity
